

Pipistrelle bats are the smallest bats in the UK. 200 of them can fit into a shoebox.
Body size: 33 - 48 mm

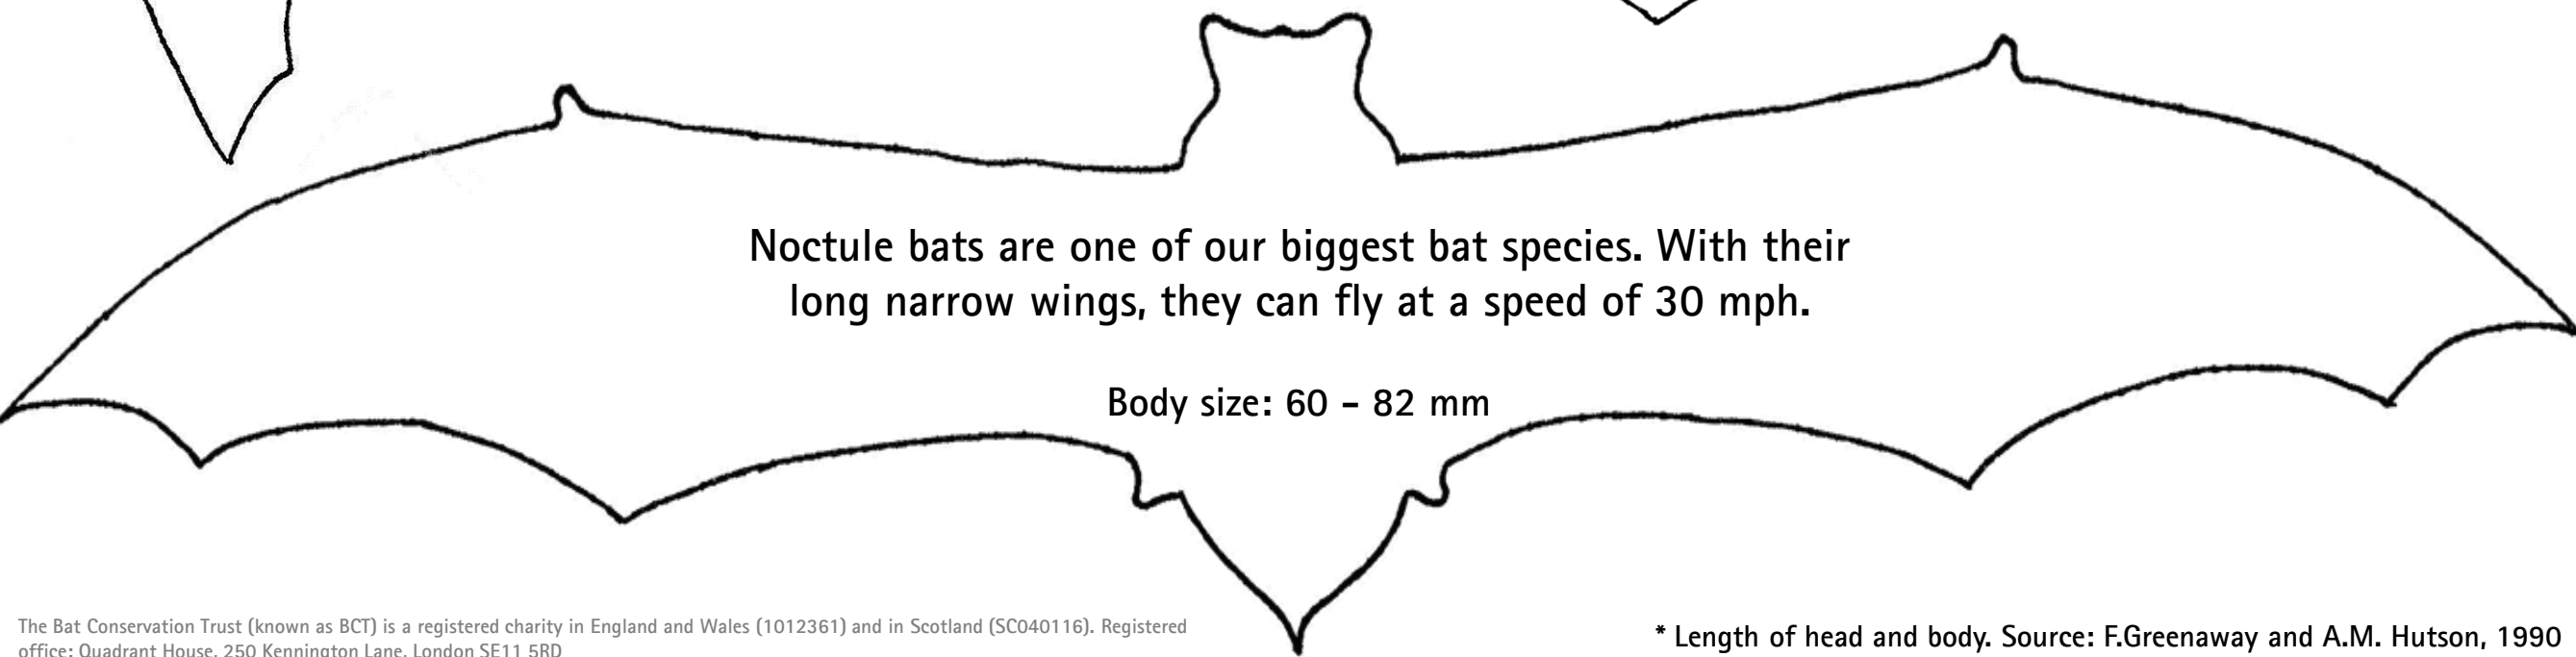

The Brown long-eared bats have exceptionally sensitive hearing and can hear a ladybird walking on a leaf.

Body size*: 37 - 52 mm

Daubenton's bats fly like hovercraft over ponds and rivers. They use their big hairy feet to snatch insects from the surface of the water.

Body size: 45-55 mm

Noctule bats are one of our biggest bat species. With their long narrow wings, they can fly at a speed of 30 mph.

Body size: 60 - 82 mm
